

Click Download The Future.

VOIDAGON X Y Z

YOUR ONE-STOP DESTINATION FOR 40+ UNBLOCKED AND UNDETECTED GAMES.

[DOWNLOAD THE FUTURE](#) [TUTORIAL](#)

40+ games so far, all undetected! + They all have disguised names.

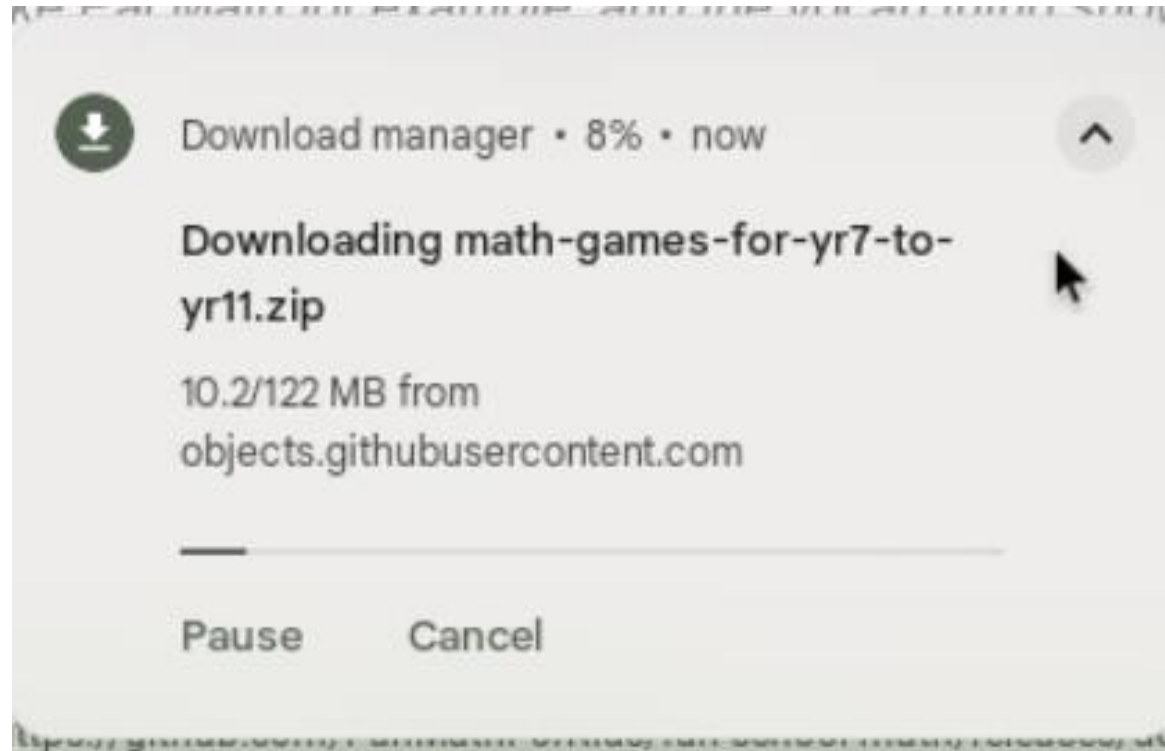

Some folders will have a text file named "Math Vocab". They say the names of the games in it because the things shown are like "PacMath" for example, and the vocab thing shows you "PacMath = Pacman".

BTW there might look like 20 games or something, but go to the "More" and "Even More" folders!

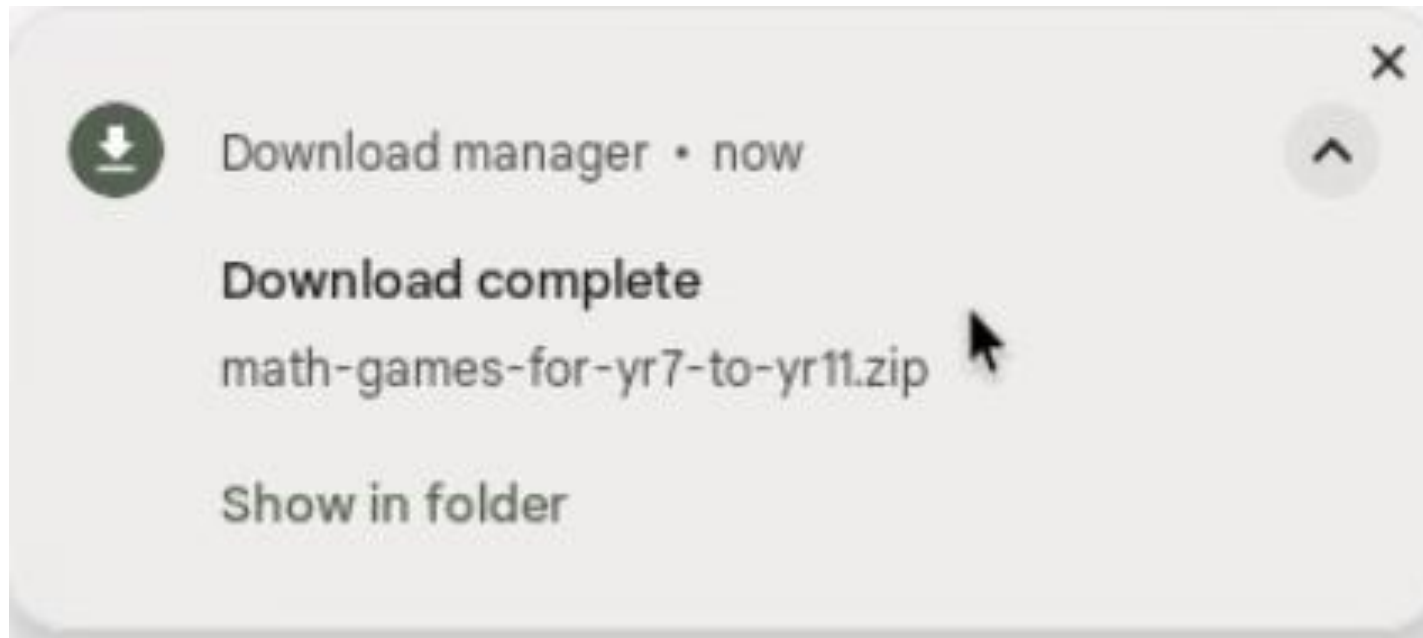

Fun fact: If you wanna know how to say VOIDAGON X Y Z, just say "hexagon" and replace the "hex" with "Void".

The name VOIDAGON X Y Z was chosen because Void + Hexagon + X Y Z = VOIDAGON X Y Z (the XYZ is because it looks cool lol).

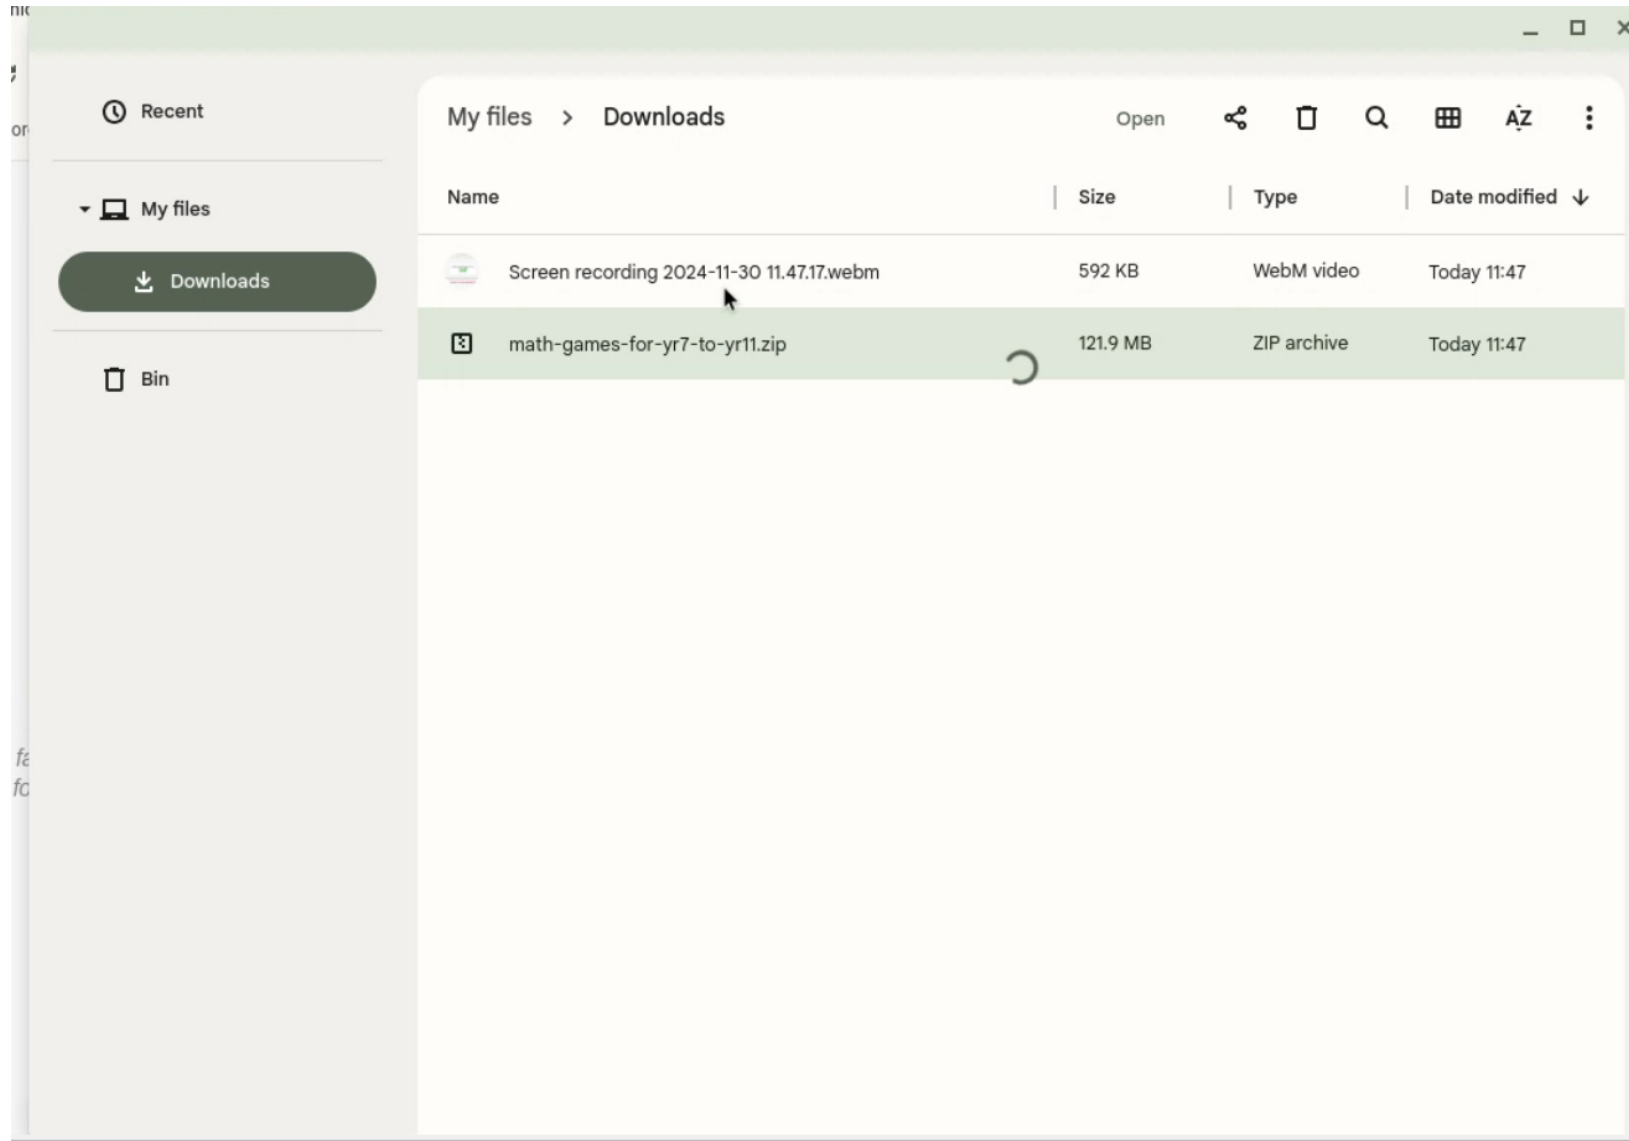

It should start downloading.

When its done, click it.

Files should open. You should see the zip file.

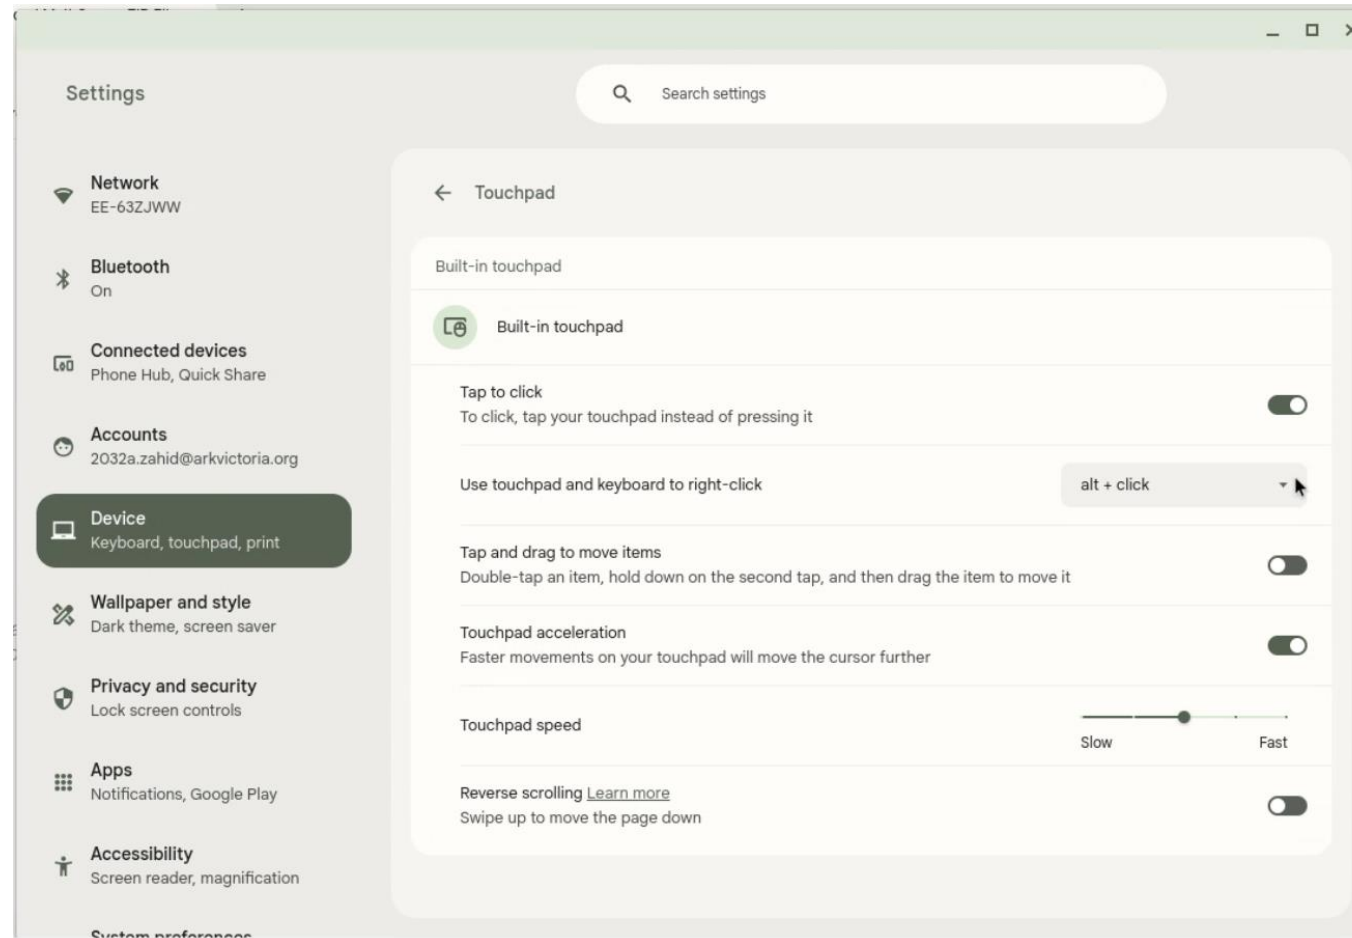

Files should open. You should see the zip file.
